

Visit us at SPS IPC Drives 2015

sps ipc drives

Hall 7, booth 200

Nuremberg, 24.-26.11.2015

The **SPS IPC Drives 2015 in Nuremberg** is just around the corner. We would like to introduce our new products to you and cordially invite you to **visit us from November, 24-26 at our booth 200 in hall 7.**

That AS-Interface is perfectly suited for interacting with virtually every available automation system is long been known. Now this passionate team player is entering new realms: with the new **AS-i Safety Gateway** from Bihl+Wiedemann drives can be safely controlled and monitored using CIP Safety on Sercos – directly and without an additional safety PLC.

Further information can be found in the latest edition of the **AS-Interface Master News Magazine** under the header "Driven by you".
