

# ASi-5 Safety Input Module, IP20, 22.5 mm

Bihl  
+ Wiedemann

## ASi-5 Safety Input Module

**2 x 2 channel safe inputs for**

- 2 x floating contacts or
- 2 x OSSDs or
- 1 x floating contacts and 1 x OSSD

**up to 8 standard inputs, depending on configuration**

**up to 8 standard outputs, depending on configuration**

**Module width of 22.5 mm,  
for optimum use of control cabinet space**

**protection category IP20**

(1) **Input voltage (sensor supply):** inputs are supplied by ASi or by AUX (auxiliary 24 V power). If supplied by ASi, inputs shall not be connected to earth or to external potential.

(2) **Output voltage (actuator supply):** outputs are supplied by ASi or by AUX (auxiliary 24 V power). If supplied by ASi, outputs shall not be connected to earth or to external potential

(3) **ASi connection:** the connection to ASi as well to AUX (auxiliary 24V power) is either made via yellow resp. black ASi profile cable with piercing technology or via M12 socket (in IP20 via clamps).

(4) **ASi address:** 1 AB address (max. 62 AB addresses/ASi network), 2 AB addresses (max. 31 modules with 2 AB addresses), Single addresses (max. 31 Single addresses/ASi network), mixed use allowed.  
For modules with two ASi nodes the second ASi node is turned off as long as the first ASi node is addressed to address "0".

Upon request, ASi nodes are available with specific ASi address profiles.

(1) loop resistance ≤150 Ω

(2) The ground connection of the 24 V power supply, which supplies auxiliary power (AUX), must be grounded!

(3)

## BWU4186, BWU4187, BWU4188 Derating total current of inputs

At ambient temperatures above 55 °C, a minimum distance of 10 mm to neighboring devices must be provided.

|   |  |
|---|--|
| (4)   | <b>BWU4186, BWU4187, BWU4188</b><br><b>Derating total current of outputs</b> |
|   |  |
| At ambient temperatures above 55 °C, a minimum distance of 10 mm to neighboring devices must be provided. |  |

- (5) See table "Peripheral fault indication"
- (6) The module is not suitable for use in paths with a passively safe-switched AUX cable, since an exclusion of errors cannot be assumed for the connection of the two ASi and AUX potentials.  
If the module is supplied from an unswitched AUX cable, this has no influence on the safety consideration for the paths with passively safe-switched AUX cable. In an ASi circuit, paths supplied from a passively safe-switched AUX cable and paths supplied from unswitched AUX potential can be used together.
- (7) Maximum ambient operating temperature +55 °C according UL certificate for the use in the USA and Canada.

# ASi-5 Safety Input Module, IP20, 22.5 mm

Bihl  
+ Wiedemann

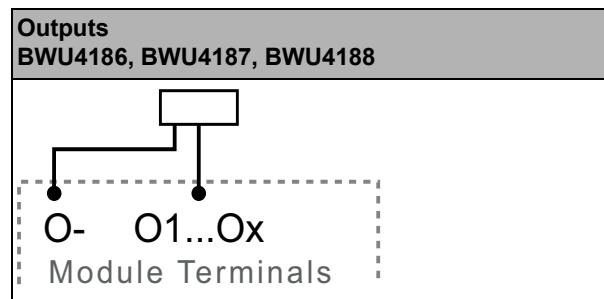

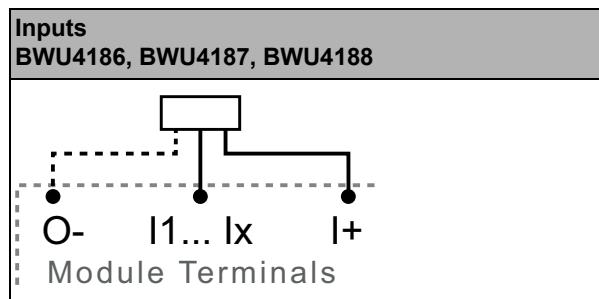

## LED status display

| LED                                | State     | Signal / Description   |
|------------------------------------|-----------|--|
| AUX<br>(green)                     | ∅         | no 24 V <sub>DC</sub> AUX  |
|                                    | ●         | 24 V <sub>DC</sub> AUX present   |
| ASI<br>(green)                     | ∅         | no ASi voltage   |
|                                    | ●<br>1 Hz | ASi voltage present,<br>but at least one ASi node is addressed „0“ or peripheral fault |
|                                    | ●         | ASi voltage present  |
| FLT<br>(red)                       | ∅         | ASi communication OK (at least one ASi node online)                                    |
|                                    | ●<br>1 Hz | at least one ASi node with peripheral fault  |
|                                    | ●         | no data exchange (with at least one correctly addressed ASi node)                      |
| S11/S12 ...<br>S21/S22<br>(yellow) | ∅         | safety input channel is switched off   |
|                                    | ●<br>1 Hz | cross-connection   |
|                                    | ●<br>8 Hz | internal error or double address   |
|                                    | ●         | safety input channel is switched on  |
|                                    | ●         | LED on   |
|                                    | ●         | LED flashing   |
|                                    | ∅         | LED off  |

In case all LEDs are blinking simultaneously in fast rhythm a fatal error has been detected.  
This message is reset by a short disconnection of the power supply (Power ON Reset).

## Power supply (PNP) via the Module

### Note

The inputs need to be supplied out of AUX+!

## Accessories:

- Bihl-Wiedemann Suite - Safety Software for Configuration, Diagnostics and Programming (art. no. BW2916)
- ASI-5/ASI-3 Address Programming Device (art. no. BW4925)
