

End User License Agreement (Software License Agreement)

Preamble

This software license agreement (the "Agreement") is made by and between a customer ("Licensee") and Bihl+Wiedemann, Inc., a North Carolina corporation ("Licensor"). Licensor and Licensee may be referred to herein individually as "Party" and together as "Parties."

1. General Conditions

- (1) These contractual license terms are a substantial and inseparable part of the software license agreement between Licensee and Licensor. By installing, copying or using the Licensed Software, Licensee consents to the terms of the following End User License Agreement (hereinafter referred to as "EULA"). If Licensee does not agree to the terms of this EULA, the installation, copy or use of the Licensed Software in any way is prohibited.
- (2) The provisions specified hereinafter shall regulate the permitted use of the Licensed Software, providing of software test versions solely for evaluation purposes during a limited period of time, and of software pre-release solely for testing purposes. The provisions for use of the Licensed Software shall apply accordingly to the granting of the licensee's rights to use the Licensed Software, whether in return for payment or free of charge.

2. Definitions

Licensed Software	Computer software offered and licensed by Licensor including any accompanying User Documentation. Unless the following provisions of this EULA expressly state otherwise, Licensed Software shall also include License-Updates and License-Upgrades of the original version and also Full and Test Versions.
Full Version	Software license with the full functionality of the Licensed Software. The customer acquires and is granted a non-exclusive, transferable and perpetual right to use the Licensed Software.
Partner Version	A license which authorizes the Licensee to the simultaneous use of Licensed Software at multiple workstations by a determined number of users without any determination by name.
Test Version	Temporary right to use Licensed Software granted solely for evaluation purposes of Licensed Software.
Software Pre-releases	Preliminary versions of the Licensed-Software (Beta Version) provided to Licensee for test purposes that may not be used in the area of production. It may contain faults.
Legacy Version	Version of the software which has been replaced by a current version, but which is still provided free of charge for certain areas of application.
Driver Software	Software that is required for the use and administration of physical products, which is provided free of charge in connection with the respective product.
Data Storage Device	Any device for storing data including, but not limited to: USB Flash Drives, CD's, DVD's, Blu-Ray Discs, Floppy Disks, Hard Drives, Solid State Drives, SD Cards, miniSD Cards, micro SD Cards, and CF Cards.
User Documentation	All the supporting contractual software documentation including user manual (digital user manual), which is supplied in electronic form or in paper form. The product data sheet can be downloaded from the homepage of the Licensor.
EDP System	A single computer, computer workstation or server.
Network	The linking of EDP Systems within Licensee's company.
Single-User-License	One license of Licensed Software for each of the Licensee's EDP systems, which may only be used on one (1) EDP system at any one time.
Copying License	A license which authorizes Licensee, to the extent provided herein, to produce copies of the Licensed Software on Data Storage Devices.
Floating License	A license which authorizes Licensee to the non-simultaneous use of the Licensed Software at multiple workstations. The Licensed Software may be installed on an unlimited number of workstations; however, simultaneous use of the Licensed Software is restricted to the number of acquired licenses. Licensor registers the number of currently granted Floating Licenses on its servers and authorizes a respective number of users until the total number of Floating Licenses obtained by Licensee is reached. If all Floating Licenses are being used, each additional user has to wait until another user terminates its session and therefore a Floating License is released.
One-Year License	A license which authorizes the Licensee to use some or all of the functionality of the Licensed Software for a period of 365 days.
Software-Update	A version of the Licensed Software with the same or more advanced functions with minor improvements for the purpose of removing errors, faults or violations, or the removal of malfunctions in the Licensed Software. A Software-Update does not add any significant additional functionality to the Licensed Software.

End User License Agreement (Software License Agreement)

Software-Upgrade	A new version of the Licensed Software or a version with enhanced functionalities or features (with a new version number if necessary).
License-Update	An update of an existing license and the associated usage right for a new version of the Licensed Software with the same license scope.
License-Upgrade	A change of the scope of a license to the Licensed Software.

3. License Grant

- (1) Subject to the terms and conditions of this EULA, Licensor hereby grants to Licensee a non-exclusive, worldwide, non-transferrable right to: (i) use the Licensed Software, including the User Documentation, for Licensee's internal business purposes; and (ii) install the Licensed Software on Licensee's workstations. If the User Documentation is available as an electronic version online, Licensor has no additional obligation to provide a printed copy of the User Documentation.
- (2) Test Versions of the Licensed Software – as well as Software Pre-releases – made available to Licensee by Licensor are subject to the terms of this EULA. Licensee receives a license fee free, non-exclusive, non-transferable and non-sublicensable right to use the Test Version for testing purposes only. The duration of the license grant in this Section 3.2 is limited to a trial period of time specified by Licensor. After the trial period, the Test Version can be unlocked with a key for unrestricted access to the Full Version by payment of license fees specified by Licensor.
- (3) This EULA also applies to software provided free of charge by Licensor including, but not limited to Driver Software and Legacy Versions.
- (4) Maintenance, installation or configuration services as well as technical support are not covered by this EULA and shall be the subject of a separate agreement if they are to be provided.

4. License fees, payment and default

If Licensor and Licensee have agreed on a paid software license, the following shall apply:

- (1) License fees specified by Licensor for use of the Licensed Software are due for immediate payment upon execution of a software license agreement. Licensee can effect payment of the license fees by credit card or on account; Licensor reserves the right to demand payment in advance. In case of any purchases of the Licensed Software made from the eCommerce website of Licensor, payment of the license fees must be made either by credit card or by advance payment.
- (2) Licensor provides Driver Software and Legacy Versions free of charge.
- (3) In the case of Trial Versions and Software Pre-Releases, a key to unlock the Full Version is available upon receipt of payment of the specified license fee.
- (4) If Licensee is in default of payment, it shall pay interest in the amount of the lesser of nine (9) percentage points above the currently applicable basic interest rate set by the European Central Bank or the maximum allowable under applicable law. Licensor reserves the right to assert any further claims for damages.

5. Extent of the license

- (1) Licensee acknowledges and agrees that the Licensed Software and User Documentation are being licensed, not sold, to Licensee by Licensor. Licensee acknowledges and agrees that, except as expressly licensed herein, Licensor, its affiliates, and/or licensors own and retain all right, title and interest in and to (i) the Licensed Software and User Documentation, including without limitation all copies, improvements, modifications (now or hereafter resulting from the efforts of Licensor, Licensee, or any other person, working together or alone), (ii) all of the service marks, trademarks, trade names, logos, slogans or any other designations associated with the Licensed Software and User Documentation, and (iii) all copyrights, patent rights, trade secret rights, intellectual property rights, and other proprietary rights relating to the Licensed Software and/or User Documentation and any improvements, ((i)-(iii) collectively, the "Intellectual Property").
- (2) Licensee will not identify itself as the owner of, or register or apply for registration of any copyright, patent, trademark, service mark or other intellectual property right relating to the Licensed Software or User Documentation.
- (3) Licensee shall ensure that all copies of the Licensed Software or User Documentation in Licensee's possession or control incorporate copyright and other proprietary notices in the same manner that Licensor incorporates such notices in the Licensed Software or User Documentation or in any manner reasonably requested by Licensor.
- (4) With the exception of any licenses provided herein, Licensee on behalf of itself and all officers, directors, members, employees, and independent contractors of Licensee hereby disclaims any right, title, or interest in or to the Intellectual Property, and agrees not to take (or allow any officer, director, member, employee, or independent contractor of Licensee to take) any action inconsistent with, or that would contest or impair the rights of Licensor to the Intellectual Property.
- (5) The Licensed Software may be used simultaneously only by a maximum number of natural persons (individuals) corresponding to the respectively total number of licenses acquired by Licensee. If Licensee has acquired a Single-User-License, it is not entitled to use the Licensed Software on more than one (1) EDP System at the same time. Licensee is entitled to use the Licensed Software on all its available hardware. If Licensee changes its hardware, Licensee shall remove the Licensed Software from its prior hardware.

End User License Agreement (Software License Agreement)

- (6) Use of the Licensed Software on more than one (1) EDP System at the same time is only permitted if Licensee has acquired the respective number of Single-User-Licenses or Floating Licenses.
- (7) If Licensee has only acquired Software-Updates or Software-Upgrades to an existing original version, it is only entitled to use these Software-Updates or Software-Upgrades for the original Licensed Software if it owns it and uses it and is the holder of a license valid for the original Licensed Software.
- (8) The right to use the Licensed Software includes the right to duplicate the Licensed Software if it is necessary in order to achieve the contractual purpose of this EULA.
- (9) Licensee may only use the functionalities and features of the Licensed Software within the scope of the relevant license. Extension of the license scope shall however be possible by acquiring implementing an appropriate license upgrade.
- (10) Licensee may not sublicense, lease, loan, or otherwise transfer the Licensed Software.
- (11) Licensee may not modify, decompile or decrypt the Licensed Software. The Licensed Software's monitoring functions or expiration of access keys may not be deactivated. Changing, modifying or adapting the Licensed Software, its User Documentation or sections thereof in any way are also prohibited.
- (12) Licensee may create one (1) backup copy of the Licensed Software, which shall be clearly marked. Licensee shall clearly identify the backup copy as "Backup Copy", mark the date of acquisition of the Licensed Software, the date of creation of the backup copy as well as a manufacturer's copyright notice. The serial number, the identification as backup copy, the date of acquisition and the date of creation of the backup copy shall be noted and provided to Licensor upon request. All copyright notices pertaining to the original Licensed Software must be adhered to and accepted.
- (13) Upon termination of the License pursuant to Section 3, Licensee shall immediately cease to use the Licensed Software and shall completely and finally delete the Licensed Software as well as any copies made, the User Documentation and any other documents from all used hardware, servers or other data storage location and to destroy any accompanying documents. Upon Licensor's written request, Licensee shall provide written evidence of the destruction and deletion of the Licensed Software.

6. Copying License, Partner Version and Floating License

- (1) Pursuant to the limitations of this Section 6, Licensee may acquire Copying Licenses from Licensor, which will entitle it to make a limited number of copies of the Licensed Software on Data Storage Devices.
- (2) Licensee may only produce as many copies of the Licensed Software as the number of Copying Licenses it has acquired.
- (3) The purchase of a Copying License does not entitle the Licensee to make copies of the Licensed Software exceeding the number of Copying Licenses acquired, or to sublicense or otherwise transfer any copies which have been produced. Licensee shall notify Licensor in writing and without any further request of the total number of copies it has produced, and, upon written request, show Licensor any such copies.
- (4) If Licensee acquires a Partner Version, Licensee may produce as many copies as agreed with Licensor, to install the Licensed Software on multiple workstations or simultaneously use the Licensed Software at more than one workstation.
- (5) A Floating License authorizes Licensee to the non-simultaneous use of the Licensed Software on multiple workstations; however, the Licensed Software may be installed on an unlimited number of workstations. If Licensee acquires multiple Floating Licenses, the software may be used on the respective number of workstations at the same time. A server of Licensor registers the number of currently granted Floating Licenses and grants the right of use to every authorized user. If all Floating Licenses are being used, each additional user has to wait until another user terminates its session, thereby releasing a Floating License. The Floating License entitles Licensee to use the Licensed Software in accordance with the terms of this EULA and on workstations or devices within the enterprise of Licensee, but in no event may Licensee use the Licensed Software on devices or workstations of third parties, including affiliated companies of Licensee.

Since the use of the Licensed Software is administrated via a central server of Licensor, the Licensed Software can only be used at a workstation which is connected to the internet and provides access to the server of Licensor. To release the Floating License, the user needs to log out of the Licensed Software.

- (6) In the event of an interruption to the connection to Licensor's server, a Floating License currently in use cannot be released or reassigned. However, Floating Licenses assigned before the disconnection remain usable. In case of interruption, Licensor shall review upon request by Licensee via E-Mail or phone and within the office hours (Monday to Friday from 9:00 a.m. to 5:00 p.m., Eastern Time), if the interruption was caused by the server of Licensor and, in such case, take reasonable effort to reestablish the connection within a time limit of 24 hours running exclusively during the office hours.

In case of interruption please contact:

Phone: 616-345-0680

E-Mail: mail@bihl-wiedemann.us

7. Additional special conditions for One-Year Licenses

- (1) A One-Year License authorizes the Licensee to use the Licensed Software according to the contract and this EULA for 365 days, beginning on the date of activation of the software. The One-Year License is available either as Single-User License or as a Floating License.

End User License Agreement (Software License Agreement)

- (2) Licensee can purchase the One-Year License as a download via the webshop. The license fee is due as an upfront payment upon execution of the contract according to Section 4 of this EULA.
- (3) The One-Year license will automatically terminate at the end of the license period and the Licensed Software will no longer be usable by Licensee. If the Licensee wants to continue the use of the Licensed Software, it may acquire a new license key by paying an additional fee.
- (4) The Licensee is obligated to notify the Licensor in writing of any defects in the Licensed Software immediately after their discovery. In the case of material defects, this shall be done by describing the time of occurrence of the defect and the detailed circumstances.

8. Breach of licenses

- (1) If Licensee breaches any of the provisions of Sections 3 to 7 of this EULA by infringing the Intellectual Property, Licensee shall pay \$5,000 to Licensor for each act of infringement. The Parties agree that quantifying losses arising from Licensee's infringement of the Intellectual property is inherently difficult and that the agreed upon sum is not a penalty, but rather a reasonable measure of damages based upon the Parties' experience in the IT-industry.
- (2) In the event of an infringement of its Licensed Software, Licensor is entitled – without prejudice to any claims for damages – to rescind the EULA including the software license agreement. In this case, Licensee shall immediately cease to use the Licensed Software and shall completely and finally delete the Licensed Software as well as any copies made, the User Documentation and any other documents from all used hardware, servers or other data storage location and to destroy any accompanying documents. Upon Licensor's written request, Licensee shall provide written evidence of the destruction and deletion of the Licensed Software.

9. Impossibility of performance

Licensor shall not be held responsible for delays in delivery or performance due to events or conditions beyond Licensor's reasonable control. Licensor may postpone the delivery or performance by the duration of the event or condition plus an appropriate startup time thereafter. Should impossibility of performance persist longer than six (6) months, Licensee shall have the right to fully or partly withdraw from the respective software license agreement as a result of part of it not yet being fulfilled. If Licensee has already paid any license fees in full or in part at this time, Licensor will immediately refund the payment made to Licensee.

If the server for the administration of the Floating License is not available, Licensor shall reestablish the availability of the server according to Section 6.5.

10. Warranty claims

- (1) Licensee shall inspect the Licensed Software immediately after it has been delivered by Licensor or after its download and before and immediately after it is installed, as far as this is possible in the ordinary course of business and, if there is any defect, to immediately give notice to Licensor.

If Licensee fails to give notice of the defect in due time, the Licensed Software is considered as approved, unless the defect is one which could not be recognized during the inspection. If such a defect appears, the notice has to be made immediately after the defect could have been discovered; otherwise the product is considered to be approved even considering this defect. To maintain the rights of Licensee, it is sufficient to send off the notice to Licensor in time. The foregoing provisions shall not apply if and in as far as Licensor has concealed a defect fraudulently.
- (2) The Licensed Software shall be considered defective if it does not have the stipulated qualities at the date of the transfer of risk, or if it is not fit for the contractually agreed use.
- (3) There is no defect if Licensee has intervened itself, or through any third parties, in the Licensed Software without the prior written consent of Licensor and the defect has appeared after the intervention. Licensee is allowed to provide evidence of the fact that the Licensed Software defect was not caused by the intervention. There is also deemed to be no defect if the Licensed Software is used on hardware or on an operating system which does not meet the requirements which are provided in product specifications for the Licensed Software. Licensor is not liable for defects following the decision of Licensee to refrain from installing (as per the directions of Licensor) a software update provided by Licensor that is necessary in order to maintain the proper functioning of the Licensed Software as provided for in this contract, within a reasonable time after having received a respective information about the update.
- (4) If there is any defect, Licensor is entitled to choose the option of remedying the defect or delivering a substitute for the Licensed Software (subsequent performance). Licensor is, however, entitled to refuse the option of subsequent performance chosen by Licensee if it would result in disproportionate costs.
- (5) Licensor can make subsequent performance conditional on the fact that a part of the agreed license fees which is adequate in proportion to the extent and gravity of the Licensed Software defect has already been paid by Licensee.
- (6) If subsequent performance fails, Licensee is entitled to terminate the agreement upon thirty (30) days written notice to Licensor. Subsequent performance is considered to have failed after the third unsuccessful attempt, unless a different situation arises due to the type of defect or the other circumstances.
- (7) Any warranty claims shall be made within twelve (12) months of the installation of the Licensed Software by Licensee.
- (8) THE LICENSED SOFTWARE IS PROVIDED "AS IS" AND "AS AVAILABLE" AND WITH ALL FAULTS AND DEFECTS WITHOUT WARRANTY OF ANY KIND. EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER PARTY

End User License Agreement (Software License Agreement)

MAKES ANY REPRESENTATION OR EXTENDS ANY WARRANTY OF ANY KIND, AND THE PARTIES HEREBY EXPRESSLY DISCLAIM ALL OTHER REPRESENTATIONS AND WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION THOSE OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, SYSTEM INTEGRATION, NON-INTERFERENCE AND/OR ACCURACY OF INFORMATIONAL CONTENT. LICENSOR DOES NOT WARRANT THAT THE LICENSED SOFTWARE AND/OR USER DOCUMENTATION WILL MEET LICENSEE'S OR END USERS' REQUIREMENTS OR THAT THE OPERATION THEREOF WILL BE UNINTERRUPTED OR ERROR-FREE, OR THAT ERRORS WILL BE CORRECTED.

11. Software Pre-releases

- (1) Software Pre-releases can be identified in particular by them being marked "Beta", "Release Candidate", "Prototype" or by similar labels.
- (2) The Software Pre-release is licensed to Licensee free of charge for test purposes only. It is not intended for use in the course of business and shall not be used on any EDP systems or networks which are used for ongoing business operations. Licensor shall not be liable for any damage suffered by Licensee using the Pre-release software version.
- (3) With the Software Pre-release, Licensee acquires the right to use this software as provided in this section 10 for the period of time agreed upon by the parties. Licensor is entitled to terminate the lending agreement at any time and demand the immediate interruption of the use of the Pre-release software and its return and deletion from the computers, EDP systems and networks of Licensee.
- (4) Licensee shall notify Licensor in writing of all error messages, operational faults etc., in describing how the fault developed and when and where it appeared.
- (5) Licensor is not liable for any damages which are caused by a violation of the above provisions by Licensee.

12. Liability

EXCEPT FOR ACTS THAT CONSTITUTE GROSS NEGLIGENCE OR WILLFUL MISCONDUCT, LICENSOR SHALL NOT BE LIABLE HEREUNDER, WHETHER IN CONTRACT OR TORT OR ANY OTHER THEORY OF LIABILITY, FOR (A) INDIRECT, SPECIAL, INCIDENTAL, EXEMPLARY, PUNITIVE, OR CONSEQUENTIAL DAMAGES OF ANY KIND; OR (B) ANY LOSS OF PROFITS OR DATA, IRRESPECTIVE OF WHETHER IT KNEW OR SHOULD HAVE KNOWN OF THE POSSIBILITY OF SUCH DAMAGES OR LOSS. EXCEPT FOR ACTS THAT CONSTITUTE GROSS NEGLIGENCE OR WILLFUL MISCONDUCT, IN NO EVENT WILL LICENSOR'S AGGREGATE LIABILITY ARISING OUT OF OR RELATED TO THIS AGREEMENT, WHETHER ARISING OUT OF OR RELATED TO BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, EXCEED THE TOTAL AMOUNT PAID BY LICENSEE TO LICENSOR PURSUANT TO THIS AGREEMENT.

13. Proprietary rights/defects of title

- (1) As far as Licensor renders the Licensed Software in accordance with production descriptions, plans, drawings, instructions or any other documents of Licensee or in accordance with devices obtained from him for reproduction, Licensee warrants that with the execution of the order, no rights of third parties, especially no intellectual property rights (hereinafter referred to as "IPR"), are infringed directly or indirectly by the Licensed Software or User Documentation. In particular, the non-infringement of the rights of third parties shall not constitute a stipulated condition of the delivery or performance to be rendered by Licensor. Licensor is not obligated to independently verify conflicting rights of third parties. However, Licensor shall inform Licensee about any rights of third parties that became known to him.
- (2) In the event a third party asserts a claim against Licensor to refrain from further performance, production or delivery of the Licensed Software covered in cases of section 13.1 with reference to a property right, or an IPR, Licensor shall be entitled – without examining the legal position – to withdraw from the order and demand compensation from Licensee for its expenses incurred so far.
- (3) Unless otherwise agreed in writing, Licensor shall only be held liable that Licensed Software is free of commercial proprietary rights and copyrights belonging to third parties in the country where the delivery site is located. If a third party asserts a valid claim against Licensee due to the infringement of proprietary rights, Licensor may at its own discretion and at cost obtain a license to use the Licensed Software or may to replace or modify the Licensed Software in a way that the propriety rights are not infringed. If Licensor is not able to obtain a license, replace, or modify the Licensed Software under appropriate conditions, Licensee is entitled to terminate this Agreement.
- (4) Licensee shall immediately notify Licensor of any such claim asserted by a third party in writing and leave any protective measures and settlement negotiations to the discretion of Licensor. If Licensee stops using the Licensed Software in order to reduce the level of damages or for any other compelling reasons, it shall inform the third party that its ceasing to use the Licensed Software is not an admission of an infringement of the third party's proprietary rights.
- (5) Licensee shall defend, indemnify and hold harmless Licensor from all claims, costs, damages, loss, liability, judgments and reasonable attorneys' fees resulting from or arising out of any third-party claim that the Licensed Software or User Documentation infringes, misappropriates or otherwise violates any U.S. intellectual property rights of any third party in the event such infringement, misappropriation, or violation is caused by Licensee, or are caused by Licensee's special requirements, by usage not intended by Licensor or the fact that Licensee has changed the performance or used it in conjunction with products not supplied by Licensor.

14. Export

- (1) Licensee is hereby expressly informed that in accordance with the relevant export conditions of United States of America, the Federal Republic of Germany, and/or the European Union, exporting the Licensed Software or the User Documentation may be subject to the duty to obtain a permission or may be excluded – e.g. due to their nature or intended use or final destination – and that infringement of such conditions may be subject to prosecution. Licensee is therefore responsible for strictly observing all national or international relevant and applicable export conditions and obtaining the approvals that may be required. With regard to this, Licensee in particular shall be advised of the following regulations:
 - If the supplied Licensed Software may only be supplied for usage relating to armament, nuclear technology or weapons technology and/or supplied to a recipient in the military with the approval of the relevant and in particular national authorities, this approval is obtained in advance in the event of resale;
 - The prohibition to deliver the Licensed Software to companies and individuals listed in the “Lists of Parties of Concern,” including but not limited to the “Denied Persons List”, the “Entity List” and the “Unverified List” of the US Department of Commerce;
 - The prohibition to deliver the Licensed Software to companies and individuals listed in the “Specially Designated Nationals and Blocked Persons List” of the US Department of the Treasury;
 - EU-Council Regulations on sanctions and embargoes, in particular the prohibition to deliver the Licensed Software to persons mentioned in the EU-Council Regulations (EU) No 2021/821, (EU) 258/2012 and (EU) 2019/125;
 - The relevant and applicable UN resolutions;
 - And the relevant and applicable German laws and lists belonging to the German authorities responsible.
- (2) Should Licensee breach the above obligations, Licensee will defend, indemnify and hold harmless Licensor from all claims and will provide full compensation for damages which Licensor’s suppliers, third parties or state and/or international bodies or organizations assert against Licensor.
- (3) Licensor may suspend the contractual performance if there are hindrances to performance on the grounds of applicable national or international regulations, especially export control provisions, embargos or other sanctions. Licensor and Licensee shall produce all information and documents required for export, shipment and import. Delays due to export inspections or authorization procedures shall cause deadlines and delivery times to be suspended. If the required authorization is not granted, the performance of this EULA shall be regarded as not possible; Licensee shall not be entitled to claim for damages with respect to the aforementioned exceeding of deadlines.

15. Miscellaneous provisions

- (1) Licensor may, at its sole discretion, modify or replace this EULA at any time. If a revision is material Licensor shall provide at least 30 days’ written notice to Licensee prior to making any such material revision. What constitutes a material revision will be determined at the sole discretion of the Licensor.
- (2) This EULA constitutes the entire agreement between Licensor and Licensee regarding Licensee’s use of the Licensed Software and supersedes all prior and contemporaneous written or oral agreements between the parties.
- (3) This EULA shall be governed exclusively by the laws of the State of Michigan without regard to conflict of law principles.
- (4) Each party agrees to the exclusive jurisdiction of the state and federal courts located within Kent County, Michigan for the resolution of any disputes arising out of or in connection with this EULA.

16. Severability clause

Should individual provisions of this EULA be or become invalid, the validity of the remaining provisions shall remain unaffected. Licensee and Licensor shall replace the invalid provision by a provision whose intended legal and economic purpose is as close as possible to that of the invalid provision.
