

AS-Interface Master News (02/2023)

EtherCAT safety technology - suitable solutions also available in large quantities

You are looking for **ASi gateways with FSoE interface** to connect AS-Interface to an EtherCAT control? Are you looking for an FSoE master to safely control **up to 32 FSoE nodes**? And you want to implement functional safety **without a higher-level safe control**?

Then use our **ASi-5/ASi-3 Safety over EtherCAT gateways** with the integrated FSoE master function. The Safety Gateways are always **available in large quantities**. We offer them in two variants: with 1 ASi circuit and with 2 ASi circuits.

Fig.: With the FSoE master function, for example, up to 32 drives can be safely switched off - even without a higher-level safe control.

ASi-5/ASi-3 Safety over EtherCAT Gateways in detail

- 1 ASi circuit, 1 ASi-5/ASi-3 master ([BWU3583](#))

- 2 ASi circuits, 2 ASi-5/ASi-3 masters ([BWU3858](#))
- Integrated decoupling
- Max. 4 A per ASi circuit
- Ethernet diagnostic interface
- Safety communication via FSoE + Safe Link
- Integrated configurable safe inputs/outputs
