

## Discover in Hanover new paths to smart automation

How would you like to profit from the perfect fit between AS-Interface and IO-Link? We will show you how easily you can configure IO-Link sensors using our AS-i gateways. Visit us at our booth H01 in Hall 9. Use our free entry ticket and come to the **HANNOVER MESSE** from **April 23th-27th**.

Fig.: AS-Interface and IO-Link – two systems that play together perfectly.

Talk to us in a relaxed exhibition atmosphere for example about:

- **AS-i Safety & PacDrive 3** – using our BWU2984 gateway you can connect both worlds to each other.
- **M8-Module** – our newly developed housing family offers you many connection points in a small space, e.g. our module BW3521 with 3 poles M8 sockets
- **Active distributors & passive distributors** – now you can choose between even more product

versions, e.g. with addressing socket and up to 9 cables.

More about our exhibition highlights as well as current topics can be found in the newest issue of AS-Interface Master News.

We look forward to meeting you in Hanover. You can find us at **booth H01 in Hall 9**.
