

Now digital: AS-Interface Master News Magazin

The **printed edition** of the AS-Interface Master News has been published for 14 years now. However, in the future we would like to make the magazine content available to you also online – in a **digital edition**, published in German and English. The current edition is only available in digital form. The next printed edition will appear as usual for the SPS, along with a digital one.

Look forward to the highlights of the digital magazine:

- **Videos, animations and interactive graphics** illustrate facts and matters
- **Related links and news** provide additional information
- **Practical cross-linking** in articles to products and related topics
- **PDFs of the articles** facilitate clear printing

The first digital edition of the AS-Interface Master News appeared already at the end of May for the **HANNOVER MESSE** and for **LogiMAT in Stuttgart**.

Speaking of fairs: We are very happy to finally meet you in person again. At this point we would like to thank again all those who visited us on site.

**ASi-5 Safety: just one address
for many safe and non-safe signals**

**Drive solutions with ASi-5 for
many leading manufacturers**

**Zero pressure accumulation with
an autonomous ZPA solution**

Further questions about our products and solutions?

We would be happy to assist you.
