Easy integration of IO-Link with the Small Starter Kit ASi-5/IO-Link
16/06/2020 | 8:00 am - 8:45 am CEST

Supplied ready for use

The starter kit includes an **ASi-5/ASi-3 Gateway, a four-port IO-Link Master and our user-friendly software suite** (see the list below for detailed information on the scope of delivery). You receive everything fully assembled and wired in a handy carrying case, and even have enough space to install your own IO-Link devices.

Advantages of IO-Link with Bihl+Wiedemann

Our IO-Link solutions not only allow you to connect various IO-Link devices on just one line without restrictions on topology. Compared to comparable PROFINET solutions, they also bring **cost advantages of up to 50 %**. Moreover, it is extremely easy to configure various IO-Link devices and with us you only pay for as many IO-Link ports as you really need. That's because in addition to the 4-port IO-Link Master, we also offer IO-Link Masters with 1 and 2 ports.

Learn more about your advantages on our IO-Link overview page.

Fig. The Small Starter Kit ASi-5/IO-Link contains an ASi-5 PROFINET Gateway (BW4211) or an ASi-5 EtherNet/IP Gateway (BW4229) and more.

Small Starter Kit ASi-5/IO-Link in detail:

- 24 V ASi-5/ASi-3 PROFINET Gateway (BWU3847); included in the BWU4211 starter kit
- 24 V ASi-5/ASi-3 EtherNet/IP + Modbus TCP Gateway (BWU3849); included in BWU4229 starter kit
- Other fieldbus systems available on request
- ASi-5 Slave / IO-Link Master with 4 Ports, IP67, M12 (BWU4067)
- Bihl+Wiedemann Software Suite for configuration, diagnostics and commissioning (BW2902)
- All devices supplied fully assembled and wired in a carry case
