

## New AS-i Safety I/O Modules

The newly available AS-i safety I/O modules with IP20 protection from Bihl+Wiedemann (BWU3427 and BWU3428) are **optimized for commissioning using ASIMON360** and as universal modules are **suitable for countless applications**. The modules offer safe in- and outputs in small space and at low cost. The inputs on the safety modules are also **flexibly configurable** for safe sensors.

Fig.: AS-i Safety I/O Module (BWU3427, BWU3428)

### The new AS-i Safety I/O Modules in detail

- Up to 8 × 2-channel safety inputs
- Up to 2 release circuits (2 × fast redundant electronic safety outputs)
- Optimal cost for safety in- and outputs on AS-i
- Optimized for use with ASIMON360
- Universal module for the greatest number of applications

### Safety input signal types

- OSSD
- Floating contacts
- Complementary (only BWU3427)
- Clocked (only BWU3427)
